## A4988 Single Stepper Test

Basic stepper driving using Arduino Uno and Pololu A4988 stepper driver board

```
int x;
```

```
void setup() { pinMode(6,OUTPUT); // Enable pinMode(5,OUTPUT); // Step
pinMode(4,OUTPUT); // Dir digitalWrite(6,LOW); // Set Enable low }
```

```
void loop() {
```

```
  digitalWrite(4,HIGH); // Set Dir high
```

```
  for(x = 0; x < 200; x++) // Loop 200 times { digitalWrite(5,HIGH); // Output high
  delayMicroseconds(500); // Wait 1/2 a ms digitalWrite(5,LOW); // Output low
  delayMicroseconds(500); // Wait 1/2 a ms } delay(1000); // pause one second
```

```
  digitalWrite(4,LOW); // Set Dir low
```

```
  for(x = 0; x < 200; x++) // Loop 2000 times { digitalWrite(5,HIGH); // Output high
  delayMicroseconds(500); // Wait 1/2 a ms digitalWrite(5,LOW); // Output low
  delayMicroseconds(500); // Wait 1/2 a ms } delay(1000); // pause one second }
```

thx for the tutorial

[FeintNightmare](#) 3 years, 10 months ago

thnx :)

[Hunmin Koh](#) 3 years, 10 months ago

1.Download A4988 Stepper Motor Driver.fzpz 2.Open Fritzing, go to Mine tab. 3.Click on a drop down menu icon on the right corner, select Import. 4. Import the downloaded part file.
